## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, drawn to a method of producing a substrate with a mark, classified in class 235, subclass 494.
  - II. Claims 19-20, drawn to a reading program for reading marks formed on a surface of a substrate, classified in class 235, subclass 462.15.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because other types of reading program or apparatus can be utilized to read the marks formed on the substrate (e.g., scanner, barcode reader, etc.). The subcombination has separate utility such as the reading program for reading marks formed on the substrate can be used to read any encoded

patterns/indicia/marks which does not require specific steps of making/producing as set forth in claimed invention of Group I.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
